Software Development

School management software

1) Dashboard: In dashboard can see total number of students, staff, and books in library. Also some short quick links is there to access all pages in dashboard. We make it user friendly to access all modules from dashboard page.

2) Settings: School Authority can create their staff/sub admin who can access the software and perform all action like student admission, fees collection etc. You can set access of list of modules by Sub Admin.

Before start student admission in one academic year school authority need to create that particular session name like 2016-2017, 2017-2018. List of class need to put under Settings that is one time entry. Ex Class I, Class II, Class III.

3) Student: New student can entry under Admission module. Based on current session, class and section new student can take admission. Roll number will be automatically generated based on class & section. Each student will get Admission number after take admission & admission number is unique. Identity card can be generated for each student. Admit card can be generated for each student. This part is very important and useful. Because administrator can search any student by student's admission no. Even anybody can find out pass out students information also. If they would lose their admission no. then administrator can search by student's session, class, and section wise.

4) Teacher : There are available all options what information generally has needed for a teacher details information like Role, Slab, Employee id, Name, Phone no, Address, Qualification, Joining date, photos etc. Administrator just put student's information according to available options.

5) Library: Manage book, Issue book, Return book and Book renewal all options are available in here. Librarian can easily handle their library.

6) Exam Report: Administrator can generate exam report from here by choosing session, class, section, student name and exam name after that the report will be generated automatically.

7) Income / Expenditure Head: This option created for some common expenses like electric bill, phone bill etc.

8) Fees Collection: Administrator can put student's fees collection details in here after that he/she can also check individual student's fees details from here.

9) Batch transfer: If need to any student transfer batch then also become change his or her Roll number, batch id. All changes are done by there.

10) Balance Sheet: All monthly or yearly balance can add or change from here.
